RG104 E-1 Box 149

Cumming Ga. Nov 9th 1887

To the Supt of Mint
Philadelphia

Dear Sir

Will you be kind enough to inform me what is the average loss in Gold Amalgam gathered by Quick silver and then cleaned at the Mint.

In other words I am interested in 45 oz of Amalgam and I wish to know how many oz of pure gold it is likely to yield and what it will be worth per oz.

Respectfully
H. L. Patterson

An amalgam is too variable, it may have very much or very little mercury in it. We have some amalgams that loose very little and softer ones that will loose half their weight

To the Supt. of Mint
Philadelphia

Dear Sir

Will you be kind enough to inform me what is the average loss in Gold Amalgam, gathered by Quick Silver, and then cleansed at the Mint.

In other words I am interested in 45 oz of Amalgam, and I wish to know how many oz of pure gold it is likely to yield and what it will be worth – per oz.

Respectfully,
H.L. Patterson

[Noted at bottom:]

An amalgam is too variable, it may have very much or very little mercury in it. We have some amalgams that lose very little and softer ones that will lose half their weight.
